**FOR THE MONTH OF SEPTEMBER 2011**

East Zone (Manila Water)		West Zone (Maynilad Water)	
<i>Areas Covered:</i> Part of City of Manila. Part of Quezon City. Mandaluyong City. Most part of Makati City. Pasig City. San Juan City. Marikina City. Taguig City and Municipality of Pateros.		<i>Areas Covered:</i> Most part of City of Manila. Part of Quezon City. Caloocan City. Malabon City. Navotas City. Valenzuela City. Muntinlupa City. Las Piñas City. Part of Makati City. Parañaque City and Pasay City.	
<b>BACTERIOLOGICAL EXAMINATION</b>			
606*	No. of Samples Examined:	795*	
606	No. of Potable Samples	795	
0	No. found to be unsatisfactory*	0	
100%	Satisfactory Compliance	100%	
0.81 ppm	Residual Chlorine	0.90 ppm	
<i>The PNSDW requires at least 0.3 ppm residual chlorine from the farthest point of the distribution system.</i>			
<b>PHYSICAL &amp; CHEMICAL EXAMINATION</b>			
Within PNSDW Standards	Taste, color, odor, turbidity, aluminum, chlorides, copper, hardness, residual chlorine, iron, manganese, pH, sodium, sulfates, TDS, zinc, conductivity, hydrogen sulfide, arsenic, barium, boron, cadmium, chromium (total), cyanide (total), fluoride, lead, mercury (total), nickel, nitrates, nitrites, selenium, antimony and pesticides.	Within PNSDW Standards	

*NOTE: \* - Philippine National Standards for Drinking Water requires that Total Coliform must not be detectable in any 100 ml sample. In case of large quantities where sufficient samples are examined, it must not be present in 95% of samples taken throughout any 12-month period. Taken from regular sampling points.*

Based on the above findings, the Committee pronounced that drinking water in the MWCI and MWSI distribution system was of **SANITARY QUALITY** with adequate residual chlorine.

**EDUARDO C. JANAIRO, MD, MPH**

Director IV  
 Chairman, Metro Manila Drinking Water Quality Monitoring Committee  
 (MMDWQMC)

Metro water is your concern too!

Give us feedback report on quality of water.
